

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**LISTING OF CLAIMS:**

1. - 23. (Canceled)

24. (Currently Amended) A photo-curable resin composition comprising a cationic photopolymerization initiator (A), a cationically polymerizable ~~compound~~ component (B) and a cyclic polyether compound (C) represented by Formula (6),

wherein the component (B) comprises a compound containing an oxetanyl group at a mass ratio of at least 1/1000 of the component (B),

the amount of the ~~compound~~ the compound (C) is 0.3 to 10% by mass, based on the sum of the components (B) and the compound (C), and

at least one of the components (B) and the compound (C) comprise a fluorine-containing organic compound in an amount of 0 to 40% by mass in terms of fluorine atom (F), based on the sum of the components (B) and the compound (C),

(6)

wherein x is an integer of 2 or more.

25. (Currently Amended) The photo-curable resin composition according to claim 24, further comprising an inorganic filler in an amount of 0 to 250 parts by mass, based on 100 parts by mass of the sum of the ~~components (A), (B) and (C)~~ initiator (A), the component (B) and the compound (C).

26-27. (Canceled)

28. (Currently Amended) A photo-curable resin composition comprising a cationic photopolymerization initiator (A), a cationically polymerizable ~~compound~~ component (B), a cyclic polyether compound (C) represented by formula (6) and another organic compound (D),

wherein the component (B) comprises a compound containing an oxetanyl group at a mass ratio of at least 1/1000 of the component (B),

the amounts of the components (B) and the compound (C) are 1 to 99.94% by mass and 0.3 to 10% by mass, respectively, both based on the sum of the components (B), and the compounds (C) and (D), and

at least one of the components (B), and the compounds (C) and (D) comprise a fluorine-containing organic compound in an amount of 0 to 40% by mass in terms of fluorine atom (F), based on the sum of the components (B), and the compounds (C) and (D),

(6)

wherein x is an integer of 2 or more.

29. (Currently Amended) The photo-curable resin composition according to claim 28, further comprising an inorganic filler in an amount of ~~9-0~~ to 250 parts by mass, based on 100 parts by mass of the sum of the ~~components (A), (B), (C) and (D)~~ initiator (A), the component (B), and the compounds (C) and (D).

30. (Currently Amended) The photo-curable resin composition according to ~~any one of claims 22 to 25~~ claim 24 or 25, wherein the component (B) contains a fluorine-containing coupling agent.

31. (Currently Amended) The photo-curable resin composition according to ~~any one of claims 26 to 29~~ claim 28 or 29, wherein the component(s) (B) and/or the compound (D) contain a fluorine-containing coupling agent.

32. (Currently Amended) A sealing agent for a flat panel display, comprising the photo-curable resin composition according to any one of claims ~~22 to 29~~ 24, 25, 28 and 29.

33. (Currently Amended) A method for sealing a flat panel display ~~using~~ comprising utilizing the sealing agent according to claim 32.

34. (Previously Presented) A flat panel display which is obtained by the method for sealing according to claim 33.
